

April 18, 2020

Evans Churchill Community Association (ECCA) would like to express support for the new Evans Churchill substation to be located at 7th Street and Roosevelt. This substation is an important and necessary piece of infrastructure that both serves as a community gateway while also providing for the continued growth and development of downtown Phoenix.

While the site selection for this needed facility was challenging, APS has been a committed community partner throughout the site selection and design process. APS staff attended regular Evans Churchill community meetings and meet directly with the ECCA Board to keep the community informed, gather valuable community insight and resolve any issues that arose.

Community engagement is critical to the success of projects within Evans Churchill and the broader community. ECCA appreciates APS's continued engagement with the community and looks forward to working with them in the future.

Sincerely,

Sean M. Johnson
ECCA Board President
